

Announcing HHQI National Campaign Updates

The HHQI National Campaign is 6-months young and moving right along. Here are a few updates of what HHQI is offering your agency:

- **Live Chat:** The next Home Health Quality Improvement Live Chat will be July 16th at 2:00 pm EDT. To arrange a personal reminder, go to the HHQI Web site at www.homehealthquality.org and follow the link for “Resources” on the gold tool bar. When you click on “Live Chat”, you will be taken to a screen where you can set your reminder. The link to view the archived Live Chats, is on the same screen.
- **HHQI Data Reports:** New HHQI Data Reports will be published around July 21st. Starting in late July, the HHQI team will begin offering an archive of previous months’ reports and a plethora of new options to enhance participants’ data report downloads. To access the data reports, please go to the HHQI Web site at www.homehealthquality.org and follow the Quick Link “HHQI Data Access”.
- **Falls Prevention Best Practice Intervention Package (BPIP):** The next BPIP will be published on July 28th with many tools and resources to assist in reducing this potentially life altering event.
- **Hospital Readmissions: The Role of Home Care:** This dynamic webinar was presented by Dr. Steve Landers live on June 30th. If you weren’t one of the 1,500+ audience members able to secure a seat on that day, the archived recording is now available on the front page of the HHQI Web site.
- **Registration:** If you haven’t registered for the HHQI National Campaign, it’s never too late! The HHQI Campaign is CMS-sponsored so there is no cost to participate in any part of the Campaign.

Feel free to contact me if you have any questions as I am the HHQI LANE (Local Area Network for Excellence) in our state, or you can visit the HHQI Web site at www.homehealthquality.org and click on the link for HHQInfo to submit your questions.

Thank you again for joining us in improving the quality of care our home health patients receive.
